

Granted wishes have an enormous impact on the sick children and their family...

Some children have few tomorrows

Some quotes from the numerous 'THANK YOU' letters we receive:

"We as a family had never been on holiday before. It was so special, so magical for the whole family to enjoy such a vacation, being able to say YES to the children when they asked for ice cream or drinks, and to see the delight and smiles on the children's faces instead of worry or tears. Also, the siblings have finally accepted the illness of their sister. These are many wonderful memories for us all. Thank you from the bottom of our hearts!"

"It was so great; we can't find the words to describe it. This experience is as good as an encouragement and for the morale, it helps families like ours in difficult times. Thank you for what you have done for us!"

"The whole family enjoyed being together without the daily worries which had plagued us for so long. You made us feel closer to each other and that each member of the family was important. Our son forgot the chemotherapy, the medicines and the hospital. He lived these days with joy. Everyday, we could see and hear how happy he was... away from pain. He was a different person, as if he had never been sick. You made a wish come true. This holiday has given our son more appetite for his life again and will help him battle his illness. Thank you for the most magical vacation, which we will treasure all our lives!"

TANGIBLE - TRANSPARENT - GRATIFYING

These are our three main characteristics.

Together we can make a sick child's wish come true

BEYOND THE MOON

gives hope, strength and joy

Together we can make a sick child's wish come true

Everyone has the right to some enjoyment and relaxation in life to forget the daily stress and strains. Because like any other child, also children suffering from a life-threatening disease express the wish to enjoy life and spend precious time together with their family, **BEYOND THE MOON** endeavours to make this happen.

BEYOND THE MOON offers these special children between 3 and 18 years old, and their families, an all-in cost-free vacation to holiday destinations appealing to the children's imagination, filled with beautiful and joyful experiences that reach beyond the Moon.

We are fully dedicated to make this family vacation - often the first and last one together - as comfortable and carefree as possible. Therefore, we propose a travel destination to a child-friendly environment meeting the special needs of the child and family. We work hand-in-hand with the primary care physician of the child; we satisfy to the family's expectations and also give feedback to the sponsor making this possible.

Many parents long for such a carefree holiday with their children. **BEYOND THE MOON** selects those families who cannot afford it and whose majority has never been on a holiday before. The joyful memories and shared relaxing moments will be cherished at all times in everyone's heart, especially should the sick child pass away.

Help us

You can help those children trade a visit to the hospital for a trip to a world of fantasy filled with love and laughter. You can help trade tears and pain for smiles and beautiful memories to cherish a lifetime.

**When a CHILD makes this wish,
YOU make it possible, and
BEYOND THE MOON makes it happen.**

Together with your company, colleagues, family, friends and relations, you can help us in many different ways: from a straightforward donation (through a deposit on our bank account or via our 'Change for Children' programme) to being involved in fundraising activities, to in-kind giving and sponsoring a family trip.

Only with your generosity, we can make a tangible difference to these children's life and their families. A wish come true provides these children with...

- a will to fight their illness and the strength to live for tomorrow
- hope and courage, most likely the best medicine
- a unique experience to treasure.

Our Moon brightens up the often dark and painful days of these children and will shine forever.

The more support we receive, the more sick children and families we can make truly happy.
